The Christie
Charitable Fund

125th
BIRTHDAY
Seddon Homes.co.uk

Seddon are proud to support The Christie Charity. We are all aware - either from personal experience or from friends and family who have been diagnosed, of the devastating effects of this disease.

Covid-19 has dealt a particularly heavy blow to cancer patients and people awaiting diagnosis. Donations and charitable fundraising is down by 50%. So now, more than ever, help is needed for The Christie to continue their excellent work, during these exceptionally challenging times.

We are supporting The Christie with your help. For every Seddon Home sold between September 1st 2020 until December 31st 2022 we will donate £250 on your behalf.

All donations enable The Christie to continue providing world class cancer care and in particular help to fund the construction of a new state-of-the-art cancer centre in East Cheshire:
The Christie at Macclesfield

The Christie at Macclesfield is a project very close to our hearts, with several of our developments located in its catchment area. The Christie at Macclesfield will make a huge difference to patients and their families in East Cheshire and beyond.

Thank you for helping to support The Christie at Macclesfield.

The Christie is the largest single-site cancer centre in Europe, treating more than 60,000 patients a year.

The Christie revolutionised the treatment of leukaemia with the world's first use of culture bone marrow.

In 1970 The Christie were the first to trial Tamoxifen which is now widely used for breast cancer treatment.
